CAREER OBJECTIVE

Motivated Computer Science Engineering (AI & ML) student with a strong interest in IoT, embedded systems, automation, and smart technologies. Skilled in Arduino, ESP32, Raspberry Pi, sensors, C, and Python. Seeking opportunities to apply technical knowledge and build practical, innovative technology solutions.

EDUCATION

B.Tech CSE (AI & ML) 2025-2029
Sandip University, Sijoul, Madhubani

TECHNICAL SKILLS

Programming	C, Python, Embedded C
Hardware & Embedded	Arduino, ESP32, Raspberry Pi, Sensors
IoT & Development	IoT, Arduino IDE, VS Code
Web Technologies	HTML, CSS, JavaScript
Version Control	Git & GitHub

PROJECTS

Smart Fisheries Monitoring System

- Designed a system to monitor environmental and water-related parameters.
- Used sensors and microcontrollers for real-time monitoring and automation.

AgriScan AI Pro

- Developed an AI and IoT-based smart agriculture system for monitoring crop and field conditions.
- Used sensors and intelligent analysis to help farmers monitor agricultural data and support better decisions.

Bluetooth Control Car

- Built a four-wheel robotic car controlled wirelessly through Bluetooth using an Arduino-based controller.
- Integrated DC motors and a motor driver for forward, reverse, left, and right movement.

Snake Detection and Alert System

- Designed a smart detection system using a camera, sensors, and AI/IoT technology.
- Generates an alert when a possible snake is detected.

Vehicle Accident Control System

- Designed a smart system to detect possible accident situations and improve vehicle safety.
- Integrated sensors and GPS/GSM or wireless communication for monitoring and emergency alert functionality.

AI Chatbot SAARTHI AI

- Developed an AI-powered chatbot to provide intelligent responses and assist users with queries.
- Built using Python, Flask, and AI APIs with an interactive web-based interface.

Smart Dustbin

- Developed an automated smart dustbin system for waste detection and management.
- Used sensors and a servo motor to detect waste and perform automatic operations.

Bluetooth & Wi-Fi Signal Jammer

- Developed a project to study wireless signal interference and the behavior of Bluetooth and Wi-Fi communication.
- Worked with wireless modules and embedded systems for signal detection, analysis, and controlled testing.

CERTIFICATIONS

- VICODATHON by AB TALKS
- Introduction to Generative AI Studio
- Introduction to AI
- GenAI Powered Data Analytics Job Simulation
- Data Entry Operator

INTERNSHIPS

- Data Science by Thiranex – 1 Month
- Python Programming Language by CodeAlpha – 1 Month

SOFT SKILLS

Communication • Teamwork • Problem Solving • Leadership • Time Management • Critical Thinking • Creativity • Project Management • Presentation Skills

DECLARATION

I hereby declare that the information provided above is true to the best of my knowledge.
